Wednesday, 2 November 2005***

Want younger, tighter looking skin, without cosmetic surgery?

Titan, a revolutionary new treatment, promising to lift sagging skin, without going under the knife has arrived at Clinic Aesthetic.

Clinic Aesthetic, located at Mater Private Clinic in South Brisbane, is Queensland's first and only clinic to offer the Titan Procedure as part of a comprehensive "3D" skin rejuvenation program, as well as exclusively offering a medical range of non-surgical cosmetic services and products all especially designed to keep you looking younger, without having to undergo plastic surgery.

The manufacturers of Titan, Cutera, an American based company, developed the product to provide patients seeking younger looking skin with an alternative to invasive cosmetic procedures and since being released in the US a little over a year ago, Titan has proven to be extremely popular.

As people age the collagen fibres in the skin stretch and loosen naturally. This results in less elasticity in the skin and in turn makes the skin droop.

The Titan Procedure treats lax and redundant skin throughout the body – including the abdomen, thighs and underarms – and is also used to tone, lift and tighten skin on the face and neck.

With very little, if any, pain to the patient, the Titan uses laser infrared light to deliver a series of quick, heated zaps deep into the inner layers of the skin to stimulate collagen rebuilding.

The infrared light source works in two different ways, firstly by heating up the weak collagen, and secondly, the light encourages the skin to produce new collagen over a period of months, which then results in a smoother, tighter, younger looking skin.

Patients of all ages can benefit from the treatment and is perfect for those with busy schedules as the procedure can take anywhere from 10 minutes to one hour, depending on the size of the area being treated.

With the Titan procedure™ there is no down-time so a person can immediately return to work or their day to day business.

The number of treatments required will depend on the area being treated and the results will vary depending on the individual, however most patients usually only require one to two treatments at the most and results can be seen immediately with the ultimate result seen progressively over the following months.

Clinic Aesthetic provides medically accredited and clinically qualified non-surgical cosmetic services. For further information on the Titan and other services offered by Clinic Aesthetic, please contact (07) 3010 3388 or visit www.clinic-aesthetic.com.au
