Che Skincare Moist Plus and Gentle Cleanse

July 16, 2010 by admin Leave a comment
 Filed under Beauty Product News, Che Skincare

LET YOUR SKIN DRINK YOU YOUNG!

We Aussies are known for liking a drink – but if red wine is your tippie it's no longer just your tastebuds that can benefit from a glass of vino. Australian skincare brand Che has harnessed the power of the humble red grape to develop its latest ground breaking product – so your skin can enjoy all the antioxidant benefits of red wine without you drinking a single unit.

The new Che Moist Plus is Che's most powerfully hydrating moisturizer yet. Derived from pure grape skin extracts and containing skin firming peptides for dewy, younger-looking skin, Che Moist Plus is infused with anti-ageing Resveratrol, a powerful antioxidant with proven anti-ageing properties.

As with all Che® products, it has been developed with Australians' lifestyles and exposure to the elements in mind, replenishing and rejuvenating the skin throughout the day when moisture levels fluctuate. In addition to its anti-aging properties, Resveratrol has also proven to prevent free radicals from damaging our bodies as well as anti-inflammatory and anti-cancer characteristics.

LET YOUR SKIN DRINK YOU YOUNG!

We Aussies are known for liking a drink – but if red wine is your tippie it's no longer just your tastebuds that can benefit from a glass of vino. Australian skincare brand Che has harnessed the power of the humble red grape to develop its latest ground breaking product – so your skin can enjoy all the antioxidant benefits of red wine without you drinking a single unit.

The new Che Moist Plus is Che's most powerfully hydrating moisturizer yet. Derived from pure grape skin extracts and containing skin firming peptides for dewy, younger-looking skin, Che Moist Plus is infused with anti-ageing Resveratrol, a powerful antioxidant with proven anti-ageing properties.

As with all Che® products, it has been developed with Australians' lifestyles and exposure to the elements in mind, replenishing and

rejuvenating the skin throughout the day when moisture levels fluctuate. In addition to its anti-aging properties, Resveratrol has also proven to prevent free radicals from damaging our bodies as well as anti-inflammatory and anti-cancer characteristics.

“Reservatrol not only makes the skin's surface firmer, it also improves elasticity and stimulates cell multiplication to keep skin young and rejuvenated,” says Che® Skincare founder and owner of Clinic

Aesthetic, Carolyn Ingram. “The use of grape skin extracts is a first for us and customers are already seeing real, noticeable results.”

The second new addition to Che’s range of cosmeceuticals is the Che Gentle Cleanser, which contains extract of Canadian Willowherb – known for its anti-viral and free radical fighting properties and ability to soothe inflamed or irritated skin. Perfect for those with sensitive or reactive skin types, the product’s gentle formulation removes your day to day impurities while the potent bioactivity of antiinflammatory molecule Oenothain-B works to soothe and heal.

Che® Skincare is renowned for its range of cutting edge, clinically-proven cosmetics that work with you to achieve truly visible anti-ageing and skin refining results. All Che® Skincare products are free of artificial colours and fragrances and are available online at www.cheskincare.com.au or in store at Clinic Aesthetic in the Mater Private Clinic, South Brisbane.
